# Public Sector Fleet Conference 25

Tuesday 10<sup>th</sup> June | One Great George Street | Westminster

An event by:

# Timetable

09:00	Registration and networking	Exhibition space
10:00	Plenary and Q&A	Telford theatre
11:30	Refreshments and networking	Exhibition space
12:00	<b>S1</b> Technology partnerships: The key to delivering multi-year budget reductions without compromising services Presented by Questar	Telford theatre
12:25	<b>S2</b> Plug In and Power Up: The EV Infrastructure Success Formula Presented by Envevo	Telford theatre
12:50	Lunch and networking	Exhibition space
13:45	<b>S3</b> From Barriers to Breakthroughs: How to Decarbonise Your Waste Fleet Presented by Cenex	Telford theatre
14:10	<b>S4</b> Data-Driven Decision Making: Turning Fleet Insights into Action – a case study Presented by Quartix	Telford theatre
14:35	Refreshments and networking	Exhibition space
15:00	<b>S5</b> National Highways – The Road to Zero: Our journey towards a zero emission fleet Presented by National Highways	Telford theatre
15:25	Chair's closing remarks	Telford theatre
15:35	Drinks reception at Kendal's Bar	Lower ground floor
16:35	Conference close	

# Welcome

#PubSecFleet

An event by:

Public Sector Connect  
Lockside Mill  
St Martins Road  
Marple  
Stockport  
SK6 7BZ

0161 482 7850  
enquiries@publicsectorconnect.org  
www.publicsectorconnect.org

All details in this conference brochure were considered to be correct at time of publication. The organisers reserve the right to change or cancel any details. Whilst every care is taken to ensure that all published information is accurate, Public Sector Connect accept no responsibility for any errors or omissions.

We are delighted to welcome delegates, speakers and sponsors to second annual Public Sector Fleet conference. This event is brought to you by Public Sector Connect.

Thanks are due to all the organisations and individuals who have advised, assisted and supported us, especially:

- Association of Fleet Professionals
- Our title sponsor Questar UK
- Conference Chair, Chris Demetriou, London Borough of Islington
- All of the speakers for their generosity with their time and willingness to share their experiences and expertise
- The exhibitors and session sponsors – it is because of them that public sector delegates can attend our events free of charge so please take the time to meet them at their stands.

We trust that all delegates will find this event informative, useful and interesting and we wish you an enjoyable day as you reconnect with old acquaintances and create new networks. We hope that you can join us for the drinks reception in Kendal's Bar at the end of the day.

Forthcoming events:

**Government Property Strategy Autumn Update 2025** – Wednesday 10<sup>th</sup> September, thestudio, Manchester

**NHS Property 2025** – Wednesday 5<sup>th</sup> November, One Great George Street, Westminster

**Digitech 2025** – Tuesday 9<sup>th</sup> December, Manchester Central

Conference Chair  
**Chris Demetriou**

Assistant Director of  
Corporate Fleet, Transport  
and Accessible Community  
Transport, Islington Council

As Islington Council's  
operator's license holder,  
Chris oversees a fleet  
of over 550 vehicles.

With over 20 years of public service experience in local government, Chris is deeply passionate about environmental issues. He is dedicated to achieving Islington Council's ambitious goal of net-zero emissions by both reducing and replacing the current internal combustion engine fleet with full battery electric vehicle equivalents. Islington Council is a leader in phasing out fossil-fuelled vehicles, having already implemented innovative technologies such as the award-winning 'upcycling' of end-of-life diesel refuse collection vehicles to electric, as well as Vehicle-to-Load & Vehicle-to-Grid (V2G) refuse collection vehicles which have powered various events across the borough. Additionally, Islington was the first local authority to operate 6 x 7.5-ton electric cage tippers and a fully accessible community transport bus.

Chris's forward-thinking approach extends to various related projects, including wider Vehicle-to-Grid technology, solar PV, and energy storage systems. His ambition is to transform the council's main fleet depot into a micro-grid in the future.

**Andy Brown**

Head of Category - Fleet,  
BlueLight Commercial

Andy leads the commercial  
staff working in the fleet  
category, covering c.£380m  
in third-party spend which  
incorporates all vehicles  
owned, leased, or hired  
by police fleet – including

those services and goods needed to repair, maintain, modify, dispose and keep vehicles safe, roadworthy and available for use. Andy is MCIPS qualified, an associate member of the National Association of Police Fleet Managers (NAPFM) and takes a leading role in the Sustainability, Infrastructure and Fleet work within BlueLight Commercial. He also sits on the NPCC Transport and Charging Infrastructure Group and ENLETS Green Mobility Group. He works closely with Fleet Managers across the UK through the NPCC Fleet Portfolio.

Andy is presenting:

***From purchase to disposal: Whole life costing and the future of alternative drive vehicles in Europe***

**Ben Copitch**

Business Development  
Director, Questar UK

Having co-founded  
Questar UK (formerly  
called Traffilog) in 2007,  
Ben has overseen the  
implementation of in-  
vehicle technology with  
some of the UK's largest

fleets and most recognisable brands. As leaders in the provision of predictive diagnostics, in-vehicle cameras and fleet management services, Questar UK delivers solutions that improve road safety, streamline processes and ensure total compliance. At the centre of all these offerings are clear and tangible returns, with most fleets seeing at least five times returns, often even within the first year. Working with major government fleets Questar understands the importance of ongoing savings with clients such as Police Scotland and The Environment Agency achieving year-on-year savings for almost a decade.

Ben is presenting:

***Public v private: How can you ensure technology implementations actually deliver?***

## Filip Kolodziejski

Policy Advisor, Office for Zero Emission Vehicles, Department for Transport

Filip Kolodziejski is a Policy Advisor in the Vehicle Policy team at the UK Government's Office for Zero Emission Vehicles. OZEV is a team working

across Government to support the transition to zero emission vehicles. Filip leads on the Government's commitment to transition its own car and van fleet to a zero emission base. He also works closely with the automotive industry, monitoring the health of the growing used EV market and developing measures to support the take-up of electric vehicles.

Filip is presenting:

***An update on the Government's Fleet commitment and how OZEV is supporting its transition to a zero emission base***

## Martin Edgecox

National Fleet Manager, National Highways – representing the AFP (Association of Fleet Professionals)

In 2022, Martin was voted onto the board of the Association of Fleet Professionals and currently

leads a team delivering both Ultra-Low and Zero-Emission vehicles to the business. Martin also leads the company fleet strategy, working collaboratively with the Department for Transport (DfT) and Office of Zero Emission Vehicles (OZEV) to meet ambitious carbon targets.

Martin has worked extensively across the automotive supply chain, managing fleets supporting several UK and European based manufacturers with just in time component supply.

Martin is presenting:

***Skills in the Fleet industry***

## George Symes

EV Transition Programme Director, Metropolitan Police Service

As EV Transition Programme Director at the Metropolitan Police, George is running a series of EV charging pilots and feasibility studies to understand the operational

changes required to integrate EVs into some of the most complex police vehicle roles including incident response vehicles, area cars and traffic cars. He also led a study on behalf of the National Police Chiefs Council (NPCC) to estimate the national funding requirement for EV infrastructure across all UK police forces on behalf of the with input from 10 UK police forces, Blue Light Commercial and the National Police Estates Group (NPEG).

Prior to his work in policing, he has supported a number of complex "on demand" fleets to decarbonise including breakdown assistance fleets, vehicle rental and vehicle sharing fleets spanning cars, e-bikes and e-scooters.

George is presenting:

***The challenges of Fleet electrification: International lessons and practical solutions***

**S1**

## **Technology partnerships: The key to delivering multi-year budget reductions without compromising services**

**12:00**

- ▶ Ben Copitch, Business Development Director, Questar UK
- ▶ Rich Clark, Head of Product, Chevin Fleet

This presentation highlights the partnership between Chevin and Questar Auto UK in transforming fleet and asset management. It showcases key integration efforts (such as the London Ambulance Service), shared ecosystem benefits and future plans.

Through a real-world case study, it demonstrates how data-driven collaboration identified and addressed recurring maintenance inefficiencies, reducing incident frequency and improving operational control. Strategic insights and lessons learned underline the value of the partnership.

---

**S2**

## **Plug in and power up: The EV infrastructure success formula**

**12:25**

- ▶ Mark Gilks, EV Fleet Specialist, Envevo

This session will look at the key stages to ensure your EV charging infrastructure project is a success. Using real-world case studies from our electrification projects at multiple NHS locations, we will cover the essential steps to take your fleet decarbonisation project from inception to energisation on time and in budget. From DNO applications to ongoing maintenance we will demonstrate how our expertise and comprehensive services support seamless transitions to electric vehicles.

---

**12:50**

**Lunch**

---

**S3**

## **From barriers to breakthroughs: How to decarbonise your waste fleet**

**13:45**

- ▶ Vicente Jofré Matamala, Fleet Decarbonisation Specialist – Waste Management, Cenex

This session will dive into the challenges of decarbonising waste fleets and introduce some of the leading solutions for the sector. From policy pressures to vehicle and infrastructure barriers, we'll outline practical solutions including fleet strategy, forward planning, and stakeholder engagement. With real-world case studies, we'll show how to turn plans into action and de-risk your fleet transition.

---

**S4****Data-driven decision making: Turning fleet insights into action – a case study****14:10**

- ▶ [Andy Edwards, Field Sales Manager, Quartix](#)
- ▶ [Denzil Calford, Fleet Manager, Bridgend County Borough Council](#)

Public sector fleets face growing pressure to deliver more with limited resources. In this session, fleet tracking provider Quartix welcomes Denzil Calford, Fleet and Transport Manager at Bridgend Borough Council, to share how he uses fleet data to tackle these challenges. With over 30 years in transport management and oversight of 1,500 vehicles across the council and South Wales Police, Denzil will showcase the five Quartix reports he finds most valuable in:

- Boosting efficiency
- Improving safety and compliance
- Cutting fuel and maintenance costs
- Supporting sustainability goals.

If you manage public sector vehicles, this is your chance to see how your fleet data can drive smarter decisions.

---

**14:35****Refreshments**

---

**S5****National Highways – The Road to Zero: Our journey towards a zero emission fleet****15:00**

- ▶ [Martin Edgecox, National Fleet Manager, National Highways](#)

---

**15:25****Chair's closing remarks**

---

**15:35****Drinks reception**

---

**16:35****Conference close**

Questar Auto UK is a leading provider of AI-driven vehicle telematics, predictive maintenance and driver safety solutions, delivering powerful insights to many of the UK's largest and most recognised fleets. Based in Luton and backed by a global technology group with a presence in over 20 countries, Questar supports over 400,000 connected vehicles worldwide, enabling clients to transform vehicle data into operational intelligence.

At the heart of Questar's offering is its advanced Predictive Vehicle Health platform. Built on proprietary deep learning algorithms and real-time edge analytics, this solution monitors millions of data points across vehicle systems to identify anomalies long before they escalate into critical failures. This proactive approach allows fleet operators to reduce unplanned downtime, manage maintenance more effectively and significantly extend asset life. By aligning predictive diagnostics with maintenance scheduling, organisations can also optimise the total cost of ownership and reduce their operational disruption.

Questar's Connected AI Cameras deliver an additional layer of protection and accountability. These smart, in-cab and road-facing camera systems use artificial intelligence to detect risky driver behaviour such as fatigue, distraction and mobile phone use in real time. Instant alerts and integrated video footage empower fleet managers to take immediate corrective action, improving driver safety, reducing liability exposure and supporting compliance with duty of care obligations. Use cases such as Surrey Fire and Rescue Service demonstrate the real-world impact of this technology in enhancing both safety and performance.

We also deliver comprehensive fleet management capabilities, including driver behaviour monitoring, fuel efficiency optimisation, and hybrid propulsion analytics.

These tools support fleet sustainability goals by helping reduce emissions and improve fuel economy, while also incentivising safer driving practices through targeted coaching and feedback. The system's intelligent energy management algorithms make it especially valuable to organisations operating hybrid or electric vehicles, where maximising efficiency is critical.

Ease of integration and a user-centric design underpin Questar's success. Its platforms are built to be scalable, intuitive, and interoperable with existing fleet and asset management systems, allowing clients to implement powerful solutions without disrupting operations. The flexible architecture supports diverse fleet types and evolving business needs, making it ideal for both small operators and enterprise-scale deployments. Real-time dashboards and custom reporting provide fleet managers with the actionable insights they need to make informed decisions, improve safety and drive continuous operational improvement.

With a deep understanding of the challenges facing modern fleets and a commitment to innovation, Questar Auto UK is not just a technology provider but a strategic partner. Whether the goal is reducing downtime, improving driver safety or achieving carbon reduction targets, Questar equips organisations with the tools to succeed in an increasingly data-driven mobility landscape.

### Why Choose Questar?

- » No upfront costs.
- » Includes storage card and all subscriptions.
- » Easy install, minimal commitment.
- » Helps meet your Duty of Care obligations under HSE and road safety law.
- » Full support from a trusted UK-based team.

### **AKFS – Built Without Compromise**

Advanced KFS Special Vehicles Ltd (AKFS) is a leading specialist in bespoke vehicle conversions, delivering innovative, high-quality solutions tailored to the unique needs of businesses across various industries.

Established in 2015 through the merger of Advanced Minibus and KFS Special Vehicles, AKFS combines over 30 years of expertise to offer a diverse range of durable and customisable vehicles.

Our product lineup includes Traffic Management Vehicles, Plant and Tool Hire vehicles, Grounds Maintenance vehicles, Car and Motorcycle Recovery vehicles, Vehicle Logistics solutions, and Minibuses.

Built on base models from leading motor manufacturers, our vehicles are trusted by local authorities, rental and fleet services, utility providers, civil and highway contractors, motor trade retailers, and charities.

We pride ourselves on delivering exceptional returns on investment through our commitment to quality, innovation, and customer satisfaction. Our experienced team works closely with clients to ensure each vehicle meets their specific requirements, solidifying our reputation as a leader in the specialist vehicle conversion industry.

# CIVICA

### **Civica – Get the most out of your fleet assets**

Civica is a leading provider of cloud software, data, and analytics solutions for the public sector. Supporting over 5,000 public bodies globally, our technology helps 100 million+ citizens by enabling more efficient and effective public services. With over 30 years of expertise, Civica empowers public sector organisations to unlock the full potential of their fleet.

TranSend Fleet Management software is a cloud subscription platform that maximises the use and value of your vehicles, from procurement to disposal. By removing paper and automating processes, you'll save up to 50% of administration time, manage fleet compliance with ease and increase driver and workshop productivity.

Visit:  
[www.civica.com/en-gb](http://www.civica.com/en-gb)

Contact:

Envevo is the UK's leading specialist in EV charging infrastructure solutions, focusing on Fleet and On-Street Charging turnkey installations. With operational coverage across the UK and Ireland, Envevo has completed over 3,000 projects, including Forecourt, eBus, eHGV, Workplace, and EV Hubs, successfully delivering EV fleet projects for Royal Mail, Amazon, and more.

Their comprehensive turnkey solution encompasses everything from grid connections as a NERS accredited ICP to on-site infrastructure, managed by skilled design and installation teams. Envevo's in-house delivery capability ensures safety and quality throughout the project lifecycle, from concept to construction and ongoing operations. This end-to-end approach helps clients meet programme timelines and streamline procurement processes.

Envevo's extensive experience in constructing complex grid infrastructure highlights the importance of seamless solutions. Their consultative approach ensures timely and budget-conscious EV installations. The design, installation, and commissioning of charging infrastructure are crucial from commercial, spatial planning, safety, and technical standpoints. Equally important is the ongoing operational performance of the infrastructure.

Envevo's Planned Preventative Maintenance (PPM) and Responsive Services ensure infrastructure resilience, supported by a dedicated Operational Services Team. Their commitment to long-term customer relationships is evident in their high customer retention rate.

Hiyacar is a UK-based mobility-as-a-service provider with the mission of connecting drivers to cars when and where they want them. Our direct-to-consumer business division enables vehicle owners to list their car or van for rent on our website or app and Hiyacar helps connect them with local drivers. Hires start from just one hour and up to 10 days.

As a CoMo-accredited car club, Hiyacar also provides public access to vehicle hire of its car club in London. Our B2B business involves car sharing tech only, or car sharing tech and cars for organisations looking to implement a pool car-sharing scheme or funded car club.

[hiyacar.co.uk](http://hiyacar.co.uk)

Jaama is a multi-award-winning fleet, leasing, hire, and driver management software innovator and has been supporting the fleet industry for over 20 years.

Jaama uses the latest technology to provide customers with greater integration, control and automation to help reduce fleet costs, improve fleet operating efficiencies and ensure legislative compliance.

Jaama's Key2 asset management software has fast become the software platform of choice for the public sector and blue light organisations. If you're a fleet manager in local authority, blue light services, or a wider public sector fleet professional, discover how Jaama's comprehensive Key2 fleet management software is already transforming public sector operations.

Come and meet Kelly Pinner and Paul Adams at our stand, who would love to discuss your current challenges and how our solutions can support your journey to smarter, safer, and more sustainable fleet operations. Discover how we can help:

- Turn fleet insights into actionable strategies that drive efficiency
- Implement robust grey fleet management solutions that reduce risk
- Improve fleet compliance through automated processes
- Gain real-time data visibility for informed decision-making
- Reduce operational costs through smarter fleet management.

### KeyNest Fleet Management Lockers

KeyNest's Fleet Management Lockers offer a secure, automated solution for handling vehicle keys, perfect for businesses looking to simplify and optimise their fleet operations. These smart lockers enable 24/7 contactless key handovers using time-limited codes, staff PINs, and user badges, ensuring that only authorised personnel can access keys. Every action is tracked in real time.

The system can integrate with existing Fleet Management Systems, automatically sending drivers instructions for key collection. Fleet managers can assign keys, manage permissions, and monitor all activity via an intuitive online dashboard or mobile app, reducing admin time and eliminating issues like lost keys.

KeyNest Lockers are available in modular formats, storing between 5 and 2,500 keys, and are suitable for purchase or lease. Built from tamper-proof galvanised steel, they require just 10 minutes to install, needing only a power source and internet connection.

Trusted by over 2,000 businesses across 17 countries, KeyNest is a proven global solution. Whether you manage a few vehicles or a large fleet, KeyNest Lockers helps simplify key access and maintenance scheduling, ensuring keys are always where they need to be, when they need to be there.

## Quartix

### Quartix Fleet Tracking

Quartix provides award-winning **fleet tracking** systems to the public sector, helping organisations improve efficiency, reduce costs, and support driver safety. Trusted by more than 30,000 businesses and authorities across the **UK, US, and Europe**, Quartix offers real-time GPS tracking, intuitive dashboards, and detailed reports to help manage fleets with confidence. With over 24 years of experience, Quartix combines technical expertise with responsive customer support to deliver a reliable and user-friendly solution.

Our easy-to-install telematics system gives fleet managers the insights they need to make informed decisions on vehicle usage and driver behaviour. Key features include dashcam integration, vehicle checks, safe speed monitoring, and customised reporting to suit your operational needs. Whether you're looking to optimise your fleet costs, meet sustainability goals, or improve service delivery, Quartix is here to help.

**Targa Telematics** is one of the leading global players in the field of IoT and the development of digital solutions and platforms for connected mobility.

With over 4 million connected assets globally, Targa Telematics has extensive experience in providing solutions tailored to meet the needs of customers across several verticals including Leasing, Short term rental as well as Public and Private Sector fleets.

Targa Telematics offers advanced and comprehensive fleet management and smart mobility solutions based on cutting-edge technology, providing live monitoring, actionable insights and a range of features to make informed decisions and optimize resource allocation.

By adopting Targa Telematics solutions, our partners can manage their fleets more efficiently, control costs, improve operational efficiency, increase the safety of drivers, vehicles and goods, ensure compliance, and proactively support the transition to more sustainable fleet operations. In addition, Targa Telematics smart mobility offers a user-friendly vehicle sharing solution allowing companies to increase fleet utilization, reduce total number of vehicles on fleet, lower use of grey fleet, more secure driving as well as reduced CO2 emissions. All this coupled with a powerful fleet admin system to measure results. For more information contact Maxine Stalker:

**Tranzaura** is a Fleet Intelligence & Management Software Company, transforming fleet operations in the Now. Tranzaura have a global reach of 500+ customers, across the UK, Ireland and Australia and are trusted by fleet and transport operators of all sizes. Tranzaura are Earned Recognition accredited for driver compliance and vehicle maintenance software.

**FleetNow** is a consolidated platform to monitor, manage and maintain a fleet & drivers. It incorporates software solutions, AI analytics, integrations and self-service dashboards, with Fleet Intelligence, with the aim to help fleets and transport operators power up decision-making and operational efficiency whilst lowering costs and risk.

0044 1604809737 | [www.tranzaura.com](http://www.tranzaura.com)

With **FleetNow** you can:

- Manage fleet asset management, compliance, costs and maintenance with the latest management software technology
- Use innovative AI-powered analytics tools that empower everyone to get intelligence about their operation
- Consolidate all information sources from disconnected fleet systems using sophisticated API tools and bulk imports
- Get immediate AI Business Intelligence insights into an operation, in your natural language and make more informed decisions faster than before
- Instantly create personalized, interactive, and actionable insights on live dashboards, whether C-suite or frontline teams.

Today's conference was brought to you by Public Sector Connect. Through our events, Public Sector Connect are dedicated to addressing the many diverse challenges faced by the UK public sector and in particular, the senior level individuals and teams charged with implementing the challenges.

Our strong relationships developed over many years with a wide range of organisations and key individuals within central government, local government, NHS and the wider public sector give us a unique insight into the many complex issues at the heart of modern-day government.

Our aim is to ensure that we provide the right environment for the greatest communication, learning and sharing of best practice to take place. Our events provide thought provoking plenary speakers, debates and informal, interactive case-study based seminars.

If your public sector organisation has a requirement for an event or you have a case study you are keen to share at one of our conferences please get in touch to see if we can help you.
